.

A 16340 battery is a rechargeable lithium-ion cell designed for compact, high-drain applications. With standard dimensions of 16mm x 34mm, it serves as a rechargeable alternative to CR123A batteries while delivering a higher voltage (3.6V – 3.7V nominal). These cells are widely used in tactical.

16340 3.7V 650mAh rechargeable lithium ion battery cell with pcm and connector in stock Application:Widely used in solar energy lamps, lawn lamps and lanterns, reserve energy model, tools, toys and so on. 1. No memory effect.2. High energy density.3. High operating voltage.4. Safety characteristics.

.

A 16340 rechargeable battery is a lithium-ion cell with a diameter of 16mm and a height of 34mm, often used in flashlights, lasers, and electronics. Its equivalents include CR123A (non-rechargeable) and RCR123A (rechargeable). These batteries offer 3.7V output, 500–800mAh capacity, and. How much does a 16340 battery cost?

The PAOWANG 3.7V 16340 Rechargeable Battery costs \$16.99 for a pack of 4.

What is a rechargeable 16340 battery?

Rechargeable 16340s cost more upfront but save long-term. Capacity ranges from 500–800mAh (16340) vs. 1,500mAh (CR123A). Use 16340 only in devices supporting higher voltage or with voltage regulators. What Are the Key Specifications of a 16340 Battery?

Standard specs include 16mm diameter, 34mm height, 3.7V nominal voltage, and 500–800mAh capacity.

When is Prime Day for a 16340 battery?

Prime Day is on July 11-12 for a 16340 battery. Results Check each product page for other buying options. Price and other details may vary based on product size and color.

What is the difference between CR123A and 16340 batteries?

16340 batteries are rechargeable lithium-ion cells (3.7V), while CR123A are non-rechargeable lithium primaries (3V). Voltage mismatch can damage devices designed for CR123A. Rechargeable 16340s cost more upfront but save long-term. Capacity ranges from 500–800mAh (16340) vs. 1,500mAh (CR123A).

What is the difference between protected and unprotected 16340 batteries?

Protected 16340 Batteries: Feature an integrated protection circuit to safeguard against overvoltage, deep discharge, and short circuits.

Unprotected 16340 Batteries: Preferred for battery packs or regulated devices that incorporate built-in battery management.

How long does a 16340 battery last?

Runtime depends on device power draw. A 700mAh 16340 lasts 1 hour in a

7W flashlight. Low-power devices (e.g., sensors) can run 2-3 weeks. Are All 16340 Batteries Protected?
