# How much does a Polish energy storage power station cost

## Overview

---

Polish utility PGE plans to invest about 18 billion zlotys (\$4.7 billion) in battery storage projects, CEO Dariusz Marzec said on Monday.

Polish utility PGE plans to invest about 18 billion zlotys (\$4.7 billion) in battery storage projects, CEO Dariusz Marzec said on Monday.

With solar prices dropping faster than a smartphone battery in winter (from \$0.238/W in Jan 2023 to \$0.13/W by December) [1], the country is racing to pair renewables with storage solutions. But what's driving Poland's new energy storage prices?

Let's unpack the trends, big-ticket projects, and.

The call for applications for the Electricity Storage and Related Infrastructure Programme, aimed at enhancing the stability of the Polish power grid, will remain open until May 30, 2025. From ESS News The Polish National Fund for Environmental Protection and Water Management (NFOŚiGW) opened on.

The much anticipated capacity market auction for 2029 conducted by Polskie Sieci Elektroenergetyczne (PSE) ended in the seventh round with a price of PLN 264.90/kW/year (\$65/kW/year). Such a clearing price rendered gas projects uneconomical and left significant room for battery storage systems to.

Poland has just rolled out one of Europe's most ambitious energy storage programmes - a €980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage.

According to plans, Poland aims to add approximately 5 GWh of energy storage capacity by 2028, utilizing subsidies and market-based mechanisms to accelerate the implementation of energy storage applications. Meanwhile, state-owned energy giant PGE plans to invest billions of euros to build over 80.

The Polish Economic Institute reported that in the power market's main auction, which was held in December 2024, storage capacity of around 2.5 GW was contracted, indicating that this was a 44 percent increase over 2023, in which the total contracted for batteries was 1.7 GW. The shift in the.
