Huawei 60kw inverter specifications

Overview

The Huawei SUN2000-60KTL-M3 is a high-efficiency three-phase solar inverter designed for commercial and industrial installations. It offers 60 kW of power, superior efficiency of 98.7%, intelligent real-time monitoring, and advanced protection features.

The Huawei SUN2000-60KTL-M3 is a high-efficiency three-phase solar inverter designed for commercial and industrial installations. It offers 60 kW of power, superior efficiency of 98.7%, intelligent real-time monitoring, and advanced protection features.

*1 The maximum input voltage is the upper limit of the DC voltage. Any higher input DC voltage would probably damage inverter. *2 Any DC input voltage beyond the operating voltage range may result in inverter improper operating.

The Huawei SUN2000-60KTL-M3 is a high-efficiency three-phase solar inverter designed for commercial and industrial installations. It offers 60 kW of power, superior efficiency of 98.7%, intelligent real-time monitoring, and advanced protection features. Its compact design, with no external fans.

Input Voltage: 1100V Max. Current per MPPT: 22A Max. Short Circuit Current per MPPT: 30A Max. Input Voltage: 1100V Max. Current per MPPT: 22A Max. Short Circuit Current per MPPT: 30A Max. AC Apparent Power: 66000VA Max. AC Active Power ($\cos\phi=1$): 66000W Max. Output Current: 100A@380V, 95.3A@400V.

The Huawei HUAWEI Inverter SUN2000-60KTL-M0 is an advanced, high-performance solar inverter designed to meet the energy needs of large-scale residential, commercial, and industrial solar power systems. This powerful inverter offers superior efficiency, a compact design, and a host of smart features.

The Huawei SUN2000-60KTL-M0 three-phase on-grid inverter redefines the efficiency of photovoltaic systems. It boasts an impressive maximum efficiency of up to 98.9% and is equipped with advanced technology to ensure

top performance. With its six MPPT trackers, the inverter efficiently adapts each.

Note a: The maximum input voltage is the maximum DC input voltage that the inverter can withstand. If the input voltage exceeds this value, the inverter may be damaged. Note b: If the input voltage is beyond the operating voltage range, the inverter cannot work properly. Note c: The PV strings.
