Huawei Mobile Base Station Equipment After-Sales

Overview

What is Huawei base station backhaul microwave?

Based on leading wireless, transmission, and datacom technologies, Huawei base station backhaul microwave solution provides fiber-level broadband wireless backhaul capabilities, ultra-low latency, fully modular architecture design, and co-site integration with wireless networks.

Does DTC sell Huawei parts?

DTC as an independent hardware supplier has been increasingly involved in offering a wide range of Huawei parts to the market, specifically over the last seven years as this OEM has grown to be the largest in the world.

What is the difference between a wireless base station and a microwave base station?

Wireless base stations are widely distributed, and the backhaul network requires high quality. The wired transmission of base stations requires high construction costs, long construction period, and high O&M costs. Microwave transmission is fast in network construction and provides a carrier-class availability of up to 99.999%.
