Huawei container energy storage standards

Overview

With the battery-pack-level thermal runaway control, Huawei's fire-free energy storage system (ESS) redefines safety. Huawei Digital Power and TÜV Rheinland jointly completed ESS safety tests on Huawei's Smart String & Grid Forming ESS Platform (LUNA2000-4472 series).

With the battery-pack-level thermal runaway control, Huawei's fire-free energy storage system (ESS) redefines safety. Huawei Digital Power and TÜV Rheinland jointly completed ESS safety tests on Huawei's Smart String & Grid Forming ESS Platform (LUNA2000-4472 series).

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.

Huawei Digital Power's Smart String & Grid Forming Energy Storage System (ESS) has successfully passed an extreme ignition test in the presence of customers and DNV, conducted under real-world scenarios and using innovative methodologies, validating its capabilities in extreme conditions.

Huawei Digital Power has made noteworthy strides in energy storage technology with its Smart String & Grid Forming Energy Storage System (ESS). Recently, this groundbreaking system successfully passed an extreme ignition test, establishing new benchmarks for safety within the energy sector.

With the battery-pack-level thermal runaway control, Huawei's fire-free energy storage system (ESS) redefines safety. Huawei Digital Power and TÜV Rheinland jointly completed ESS safety tests on Huawei's Smart String & Grid Forming ESS Platform (LUNA2000-4472 series and LUNA2000-215 series). As a.

Huawei's Smart String Grid-Forming ESS ensures robust protection through five layers of integrated safety design, from individual cells, battery packs, racks, systems, and the grid. Built for reliability, this approach promises end-to-end safety throughout its lifecycle, covering manufacturing.

On March 7, 2025, Huawei Digital Power announced a significant milestone for its Smart String & Grid Forming Energy Storage System (ESS). The system successfully passed an extreme ignition test, impressing both customers and experts from DNV, a globally recognized independent organization in risk.
