Overview

How many solar power plants are in Hungary?

Hungary has deployed almost 8 GW of solar capacity, according to the country's deputy minister of energy, Gábor Czepek. In a social media post, Czepek said that more than 300,000 solar power plants are operating across the nation, with over four-fifths of the existing capacity installed since 2020.

How has Hungary progressed in the development of solar energy?

Hungary has made significant progress in the expansion of solar energy in recent years, both in the area of private solar installations and in the construction of large industrial solar power plants.

Does Hungary have a solar energy program?

Hungary's advancements in its solar energy program are evident in how quickly the highest capacity solar power plants have been outdone by newer plants, as shown throughout the article. Hungary is currently experiencing rapid advances in solar power.

How much solar power will Hungary produce in 2022?

Relatedly, solar power produced 12.5% of the country's electricity in 2022, up from less than 0.1% in 2010. In 2023, the country's Minister of Energy, Csaba Lantos, predicted Hungary's target for 6,000 MW of PV capacity by 2030 would likely be exceeded twice over, hitting 12,000 MW instead.

How big is the solar industry in Hungary in 2023?

At the end of 2023, the installed PV capacity in Hungary was around 5.6 GW, after around 1.6 GW was added in 2023. Compared to 2022, this addition represented an increase of approximately 45%. Given such figures, it is not surprising that the Hungarian solar industry is optimistic about the future.

Is solar power a viable option in Hungary?

Solar power has unique potential in Hungary, where 1950 – 2150 sunny hours offer the potential for 1,200 kWh/m² per year, greater than numerous other European nations. Other renewable energy solutions, like hydroelectric power, are less viable in the area.
