# Indonesian power storage companies

### ESS

## Overview

---

This article will introduce to you the top 5 solar battery storage companies in Indonesia, namely PT Adaro Power, TYCORUN, UPS PASCAL, Xurya, PT New Indobatt Energy Nusantara. Who are Indonesian solar battery storage companies?

Indonesian solar battery storage companies mainly include energy storage system integrators, charging infrastructure providers, battery manufacturers, energy storage project developers and energy storage product traders. These companies focus on different aspects such as development, design, construction, production and trade.

Why is battery energy storage system important in Indonesia?

However, given the challenge of Indonesia's geological landscape, with many off-grid and remote areas, there is growing intermittency issue that hamper the development of solar and wind generation. Hence, the battery energy storage system (BESS) technologies have a critical role in the development of Indonesia's renewable energy.

Why do Indonesians need energy storage?

Indonesia's focus on industrial growth creates a demand for reliable power. BESS can offer backup power, improve power quality, and enable cost savings through peak shaving. The Indonesian government recognizes the importance of energy storage.

Does Indonesia need solar & wind energy storage?

Although, there is no policy mandating the installation of energy storage in solar or wind projects in Indonesia, the abundance of solar and wind resources in Indonesia's archipelago and increased potential demand across industries indicate that BESS demand is poised to grow substantially in the near future.

What percentage of Indonesia's energy comes from coal?

In 2023, Indonesia derived approximately 60% of its energy from coal, while renewable energy's contribution is estimated at about 15%. By 2025 and 2030, the Indonesia government aims to achieve the target of 23% and 30% of renewable energy contribution into the energy mix.

Is Indonesia a market in the energy transition?

Indonesia is a market in the energy transition as the country is moving from fossil fuels to clean energy resources. In 2023, Indonesia derived approximately 60% of its energy from coal, while renewable energy's contribution is estimated at about 15%.
