Internal modules of container energy storage system

Overview

What is containerized energy storage system?

s— 01 The Containerized Energy Storage System is built for easy maintenance for increased safety

What is containerized ESS?

ABB's containerized energy storage system is a complete, self-contained battery solution for large-scale marine energy storage. The batteries and all control, interface, and auxiliary.

What is ENERC liquid cooled energy storage battery containerized energy storage system?

EnerC liquid-cooled energy storage battery containerized energy storage system is an integrated high energy density system, which is consisting of battery rack system, battery management system (BMS), fire suppression system (FSS), thermal management system (TMS) and auxiliary distribution system.

Does ABB offer a containerized energy storage system?

ABB's Containerized Energy Storage System is suitable for a wide variety of ships abb.com/marine—We reserve the right to make technical changes or modify the contents of this document without prior notice. With regard to purchase orders, the agreed particulars shall prevail. ABB AG does not accept.

How many battery cells are in a ENERC liquid cooled container?

The battery system is composed of 10 battery racks in parallel. Each battery rack contains 8 battery modules by series connection, each battery module is composed of 52 battery cells in series connection also, so each rack contains 416 battery cells. Totally, EnerC liquid-cooled container's configuration is 10P416S.

What equipment is included in a shipping container?

equipment are delivered in a single shipping container for simple installation on board any vessel. The standard delivery includes batteries, power converters and transformer for connection to the ship's power system, energy storage control system, cooling and ventilation, fire detection and CC.

How does a container transport system work?

The container complies with the ISO standard. The system is installed in 20 ft, 40 ft and containers of other sizes according to the system size, and the containers can be combined together. In this configuration, the system can be transported by trailer on land and by container carrier over water (Figure 2).
