Inverter industry in solar

Overview

What is the global PV inverter market size?

The global pv inverter market size was estimated at USD 13,088.5 million in 2023 and is projected to reach USD 41,869.7 million by 2030, growing at a CAGR of 18.1% from 2024 to 2030.

How big is the solar inverter market?

The global solar inverter market size was reached at US\$ 8.12 billion in 2021 and is anticipated to rake around US\$ 16.88 billion by 2030. How much is the CAGR of solar inverter market?

.

What is driving the global solar (PV) inverter market?

All of these aforementioned trends and factors are driving the growth of the global solar (PV) inverter market over the projected period. The central inverter segment dominated the market with share of 49.5% in 2021. The central solar (PV) inverter is widely applicable in industries.

What was the market size of PV inverter in 2024?

The market size for PV inverter was valued at USD 34.6 billion in 2024 and is projected to reach USD 90 billion by 2034, growing at a CAGR of 9.5% during the forecast period. What was the market share of the three-phase segment in 2024?

.

What drives the solar inverter market?

The most significant driver of the solar inverter market is the global push towards renewable energy sources to combat climate change and reduce dependence on fossil fuels. Governments worldwide are implementing

ambitious targets to increase their share of renewables in the energy mix.

How is the solar PV inverters market segmented?

The solar PV inverters market is segmented by inverter type, application, and geography. By inverter type, the market is segmented into central inverters, string inverters, and micro-inverters.
