# Is it okay to bring an outdoor power supply to Latvia

## Overview

---

Do I need a power adapter in Latvia?

If your devices are compatible with these specifications, you will not need a power adapter. However, if your devices use a different plug type or are not compatible with the voltage in Latvia, you will need a power adapter and/or a voltage converter/transformer.

Do Europeans need a travel adapter in Latvia?

Europeans do not need a travel adapter or transformer when traveling to Latvia. Most device plugs will work with the outlet types in Latvia. Also, the voltage in Latvia is the same as in Europe. What Outlet does Latvia Use?

Type C plug sockets are used in Europe, Africa and Asia. They have two round pins and no grounding pin.

What types of plugs are allowed in Latvia?

Latvia has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets. Typically, type C plug sockets are not allowed to be installed in Latvia: these outlets are not earthed and are therefore considered dangerous.

Do I need a voltage converter in Latvia?

Since Latvia uses Type C and F outlets, you'll need a Type A/B to Type C/F adapter. Additionally, as the voltage in North America is different, you may also need a voltage converter for devices that are not dual-voltage. Ensure your devices are ready as you explore the vibrant streets of Riga or the beautiful landscapes of Gauja National Park.

What is the voltage in Latvia?

Just like the rest of Europe, the voltage in Latvia is 230 volts and the frequency is 50 Hz. Latvia has standardized on type F sockets and plugs. Type

C and type E plugs can also be used thanks to their compatibility with type F sockets.

What type of electrical outlet does Latvia use?

Latvia primarily uses Type C and Type F electrical outlets. These types are common in many European countries. Also known as the standard “Euro” plug, Type C outlets have two round pins. Also known as “Schuko,” Type F outlets have two round pins with two earth clips on the side. The standard voltage in Latvia is 230V, and the frequency is 50Hz.
