Where should I install my outdoor outlet?

How do you install a power outlet cover?

Screw down the mounting tabs on the outlet. Screw on the cover gasket around the outlet. Then install the cover. Inside, trim the interior end of the cable so that you have 4-inches sticking out of the electrical box. Remove the cable sheathing down to 1/2-inch. Use wire strippers to strip 1/2-inch of insulation from each individual wire.

How do I install a new electrical outlet?

Use a stud finder to find the exact locations of the wall studs before you begin drilling or cutting.
