Liquid Cooling Energy Storage Cabinet Integrated Machine

Overview

The 215kW Intelligent Energy Storage Liquid-Cooled Integrated Cabinet is specifically designed for commercial and industrial scenarios. It uses liquid-cooling temperature control technology to precisely regulate temperature (temperature difference $\leq 3^{\circ}\text{C}$).

The 215kW Intelligent Energy Storage Liquid-Cooled Integrated Cabinet is specifically designed for commercial and industrial scenarios. It uses liquid-cooling temperature control technology to precisely regulate temperature (temperature difference $\leq 3^{\circ}\text{C}$).

Our industry-leading solar battery storage solutions feature safe and durable LFP (Lithium Iron Phosphate) technology, high charge/discharge rates (1P or 1C), exceptional energy density, advanced thermal safety, and efficient high-power cooling. Whether you need energy storage for industrial.

The SolaX ESS-TRENE Liquid Cooling is a high-efficiency C&I energy storage solution featuring multi-level protection (IP55) and liquid thermal management for enhanced safety. It achieves 99% efficiency with modular scalability (up to 3.44MWh) and supports AI-powered energy optimization via SolaX.

GSL ENERGY's All-in-One Liquid-Cooled Energy Storage Systems offer advanced thermal management and compact integration for commercial and industrial applications. Ranging from 208kWh to 418kWh, each BESS cabinet features liquid cooling for precise temperature control, integrated fire protection.

As an industry-leading BESS manufacturer with ISO 9001-certified production facilities, GSL Energy delivers premium battery energy storage solutions for demanding commercial and industrial applications. Our newly launched liquid cooling energy storage system represents the culmination of 15 years'.

The commercial and industrial energy storage solution we offer utilizes cutting-edge integrated energy storage technology. Our system is designed to enhance energy density and thermal performance, accelerate installation times, engineered for optimal serviceability, and minimizing capital.

Vericom energy storage cabinet adopts All-in-one design, integrated container, refrigeration system, battery module, PCS, fire protection, environmental monitoring, etc., modular design, with the characteristics of safety, efficiency, convenience, intelligence, etc., make full use of the cabin.
