Lithium battery energy storage price

Overview

How much does a lithium ion battery cost?

The average price of lithium-ion battery packs is \$152/kWh, reflecting a 7% increase since 2021. Energy storage system costs for four-hour duration systems exceed \$300/kWh for the first time since 2017. Rising raw material prices, particularly for lithium and nickel, contribute to increased energy storage costs.

How much does energy storage cost?

Energy storage system costs for four-hour duration systems exceed \$300/kWh for the first time since 2017. Rising raw material prices, particularly for lithium and nickel, contribute to increased energy storage costs. Fixed operation and maintenance costs for battery systems are estimated at 2.5% of capital costs.

How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.

Why are lithium-ion batteries so expensive in 2025?

In 2025, lithium-ion battery pack prices averaged \$152/kWh, reflecting ongoing challenges, including rising raw material costs and geopolitical tensions, particularly due to Russia's war in Ukraine. These factors have led to high prices for essential metals like lithium and nickel, impacting the production of energy storage technologies.

Why are lithium batteries so expensive?

Lithium, cobalt, and nickel are the most important components. Their prices often change due to supply and demand. In recent years, lithium prices have dropped sharply. This happened because more companies started mining

lithium and demand slowed down. BloombergNEF reports that battery pack prices closely follow raw material costs.

How much does energy storage cost in 2024?

As we look ahead to 2024, energy storage system (ESS) costs are expected to undergo significant changes. Currently, the average cost remains above \$300/kWh for four-hour duration systems, primarily due to rising raw material prices since 2017.
