# Malta Energy Storage Power Station Project

## Overview

---

A project to build two massive battery storage systems that can capture electricity generated from renewable energy sources is now open to bidders. The battery energy storage systems (BESS) will be located in Marsa and Delimara, on Enemalta grounds in both localities.

A project to build two massive battery storage systems that can capture electricity generated from renewable energy sources is now open to bidders. The battery energy storage systems (BESS) will be located in Marsa and Delimara, on Enemalta grounds in both localities. First announced in June 2023.

The project consists of the design, procurement, installation, and commissioning of a utility-scale battery energy storage ('BESS') facility with a minimum capacity of 64MWh (32MW) within a specified site at the Delimara Power Station. The Project will enable a higher share of renewable energy.
