Market with energy storage equipment

Overview

The global energy storage systems market was estimated at USD 668.7 billion in 2024 and is expected to reach USD 5.12 trillion by 2034, growing at a CAGR of 21.7% from 2025 to 2034, driven by the increasing integration of renewable energy sources, advancements in battery technology, and the rising demand for grid stabilization and energy efficiency. What is the energy storage systems industry?

The energy storage systems industry by technology is segmented into pumped hydro, electro-chemical, electro-mechanical, and thermal. The energy storage systems reached USD 433 billion, USD 535.8 billion and USD 668.7 billion in 2022, 2023 and 2024 respectively.

What is the market size of energy storage system (ESS)?

The market is projected to reach USD 25.08 Billion by 2035, expanding at a CAGR of 11.5% from 2025 to 2035. ESS is used as an application system in energy networks which is required for balancing the supply and demand through energy storage.

How big is the energy storage industry?

Energy storage systems (ESS) in the U.S. was 27.57 GW in 2022 and is expected to reach 67.01 GW by 2030. The market is estimated to grow at a CAGR of 12.4% over the forecast period. The size of the energy storage industry in the U.S. will be driven by rising electrical applications and the adoption of rigorous energy efficiency standards.

What is the average energy storage deal size?

The average deal size stands at USD 92.1 million according to our data. This energy storage report is based on proprietary data from our AI-powered StartUs Insights Discovery Platform, which tracks 7 million global companies, 20K+ technologies and trends as well as 150M patents, news articles and market reports.

How much money did energy storage systems make in 2022?

The energy storage systems reached USD 433 billion, USD 535.8 billion and USD 668.7 billion in 2022, 2023 and 2024 respectively. The pumped hydro technology battery uses excess electricity to pump water from lower to upper reservoir.

What are the top 5 energy storage systems companies in 2024?

Top 5 companies including BYD, General Electric, LG Energy Solution, Siemens and Samsung held a market share of over 40% in 2024. Major key players are working to develop cost-effective and wide range of ESS. Among these companies BYD is one of the largest share holding company in the energy storage systems industry.
