Matching energy storage batteries and solar panels

Overview

Find out how to pair your solar panels with battery storage, with insights from 8MSolar for peak energy efficiency.

Find out how to pair your solar panels with battery storage, with insights from 8MSolar for peak energy efficiency.

The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. Coupling solar energy and storage technologies is one such case. The reason: Solar energy is not always produced at the time.

Selecting the right solar energy storage system requires proper capacity calculation, discharge depth (DOD), cycle life, and matching solar power generation with storage batteries. This article will guide you through the key factors to consider when choosing the ideal home battery storage system.
