Overview

What does Mauritania's new solar-wind power plant mean for the world?

Mauritania has signed its first independent power producer contract, a \$300 million agreement with Iwa Green Energy to develop a 60-megawatt hybrid solar-wind power plant. The project marks a milestone in the country's drive to expand electricity generation through private financing while accelerating its transition to renewables.

How will Mauritania's new solar power project help agri-food industry?

The project will provide rural electrification for 40 localities in south-eastern Mauritania, through the installation of hybrid mini photovoltaic power plants and the construction of connecting lines. The project will also support value-creating activities, especially in the food cold chain and agri-food processing.

What is Mauritania's new power plant?

The project marks a milestone in the country's drive to expand electricity generation through private financing while accelerating its transition to renewables. The facility, scheduled to come onstream in September 2026, will boost Mauritania's installed capacity of about 450 megawatts.

Who is Mauritania's first independent power producer?

Department of Communications and External Relations, media@afdb.org
Mauritania has signed its first independent power producer contract, a \$300 million agreement with Iwa Green Energy to develop a 60-megawatt hybrid solar-wind power plant.

Can Mauritania accelerate the implementation of IPP projects in the Sahel?

Daniel Schroth, Director of Renewable Energy and Energy Efficiency at the African Development Bank, commended Mauritania for taking this important step in applying the Desert to Power Joint Protocol, illustrating its relevance as a tool for accelerating the implementation of IPP projects in the Sahel.

How much money does Mauritania receive from the AfDB & GCF?

Her fiction and non-fiction narratives captivate and resonate with a diverse audience, showcasing her versatility and depth as a writer. Mauritania receives \$289.5 million from the AfDB and the GCF to develop solar power generation, transnational electricity interconnection and rural electrification.
