Mobile base station equipment inverter construction company

Overview

Where are Elgin power solutions Mobile substations made?

All Elgin Power Solutions mobile substations are crafted and rigorously tested at our state-of-the-art facility in West Virginia. The entire assembly, including transformers, trailers, and structural steel, is manufactured in the USA.

What is a GE mobile substation?

GE provides complete turnkey mobile substations that include commissioning services, transportation, energizing and training to ensure the most flexible and effective solution. GE's mobile substations are a turnkey solution, adapted to the specific requirements of each customer.

What makes Elgin Mobile substations unique?

Our mobile substations feature superior transformer quality, overall craftsmanship and are designed with a focus on real world use. Elgin maintains an excellent field failure rate - zero. Elgin's mobile substations often incorporate circuit switchers, breakers, capacitor banks, switchgear and regulators—designed to meet your power needs on the go.

Are GE Mobile substations a turnkey solution?

GE's mobile substations are a turnkey solution, adapted to the specific requirements of each customer. Each project is unique and our project management team works closely with our customers to make sure that the huge range of possibilities are focused to the ideal customized solution.
