Mongolia rooftop solar power generation system

Overview

The power station spans over an area of 30 hectares. It is expected to generate 15.5 GWh of electricity annually. It will be connected to the national grid via Murun substation. It will consist of 33,048 . The voltage output from the PV modules will be stepped up with 0.6/35kV step-up to medium voltage and further with 35/110kV to high voltage level to be connected to .

Mongolia has connected a 10 MW solar farm to the grid, as part of a plan to deploy 40.5 MW of solar and wind capacity in the nation's western regions. The Asian Development Bank (ADB) and the government of Mongolia have inaugurated a 10 MW solar power plant in Mongolia's Govi-Altai province.
