The utility is procuring two grid-scale battery storage systems to the tune of EUR 48 million (\$55.9 million). EPCG, Montenegro's largest electricity provider, is investing in two four-hour battery energy storage systems (BESS) to strengthen grid resilience and balance supply and demand. Each.

Montenegro has taken a decisive step toward modernizing its power system with a €48 million investment in large-scale battery energy storage systems (BESS). State-owned utility Elektroprivreda Crne Gore (EPCG) has launched an international tender for two commercial and industrial energy storage.

These systems promise to revolutionize the stability and efficiency of the national grid, marking a pivotal moment in the country's journey toward a cleaner energy future. The energy sector in Montenegro currently stands at a crossroads, with a mix of traditional hydropower and thermal power plants.

Montenegro's power utility, Elektroprivreda Crne Gore (EPCG), is preparing to open a significant tender for the procurement of battery energy storage systems (BESS) with a total capacity of 240 MWh. This initiative is part of the country's broader strategy to enhance its energy infrastructure and.

Montenegro's state-owned power company, Elektroprivreda Crne Gore (EPCG), is pioneering the installation of battery energy storage systems (BESS) to enhance energy system efficiency and support renewable energy integration. Main Content: Elektroprivreda Crne Gore (EPCG), the largest state-owned.

Montenegro's state-owned power utility, EPCG, has initiated the preparation of a feasibility study and project design for the procurement of battery energy storage systems (BESS) with a total capacity ranging from 240 to 300 MWh. According to Zoran Miljanić, a member of EPCG's Board of Directors.
