Mozambique lithium energy storage power supply procurement

Power Conversion System

- Single-stage three-level modularization
- Multi-branch input to reduce battery series and parallels connection

Overview

The Energy Regulatory Authority is seeking two qualified independent power producers to develop, finance, build, own, operate and transfer two lots of solar-plus-storage projects in the provinces of Nampula, Zambézia and Sofala, all located along the eastern coast of Mozambique, and the province of Gaza in the south. What is lithium consolidated (Li3) doing in northern Mozambique?

Further to the announcement dated 25th March 2019 Lithium Consolidated Ltd (“Lithium Consolidated”, “Li3” or the “Company”) is pleased to announce it has been granted three (3) new lithium exploration licenses in the Alto Ligonha Pegmatite Province in northern Mozambique (the “Mozambique Licenses” or “Licenses” (see Figure 1, below).

What is get fit Mozambique – solar PV + Bess tender?

Currently, the first two tender windows are in preparation: GET FiT Mozambique – Solar PV + BESS tender facilitates investments in grid-connected Solar PV IPP Projects with energy storage. EDM acts as the IPP’s counterpart in Power Purchase Agreements (PPA) and energy off-take.

What is EDM doing in Mozambique?

EDM and Mozambique support the development of renewable energy projects, having launched public tenders for solar and wind projects, the country is also exploring battery storage solutions. The largest power generation plant in the country is the Cahora Bassa hydro dam, operated by the government owned Hidroeléctrica de Cahora Bassa (HCB).

Why is Mozambique a major energy exporter?

Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) – South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities.

When did independent power projects start in Mozambique?

The first Independent Power Projects (IPPs) in Mozambique came online in 2015. These projects have paved the way for future IPP negotiations and, more recently, the standardization of tendering documents. Given EDM's weak financial capabilities, future IPPs will continue to rely on development banks for financing.

Why is rural electrification a priority in Mozambique?

To mitigate the cost of expanding the grid to rural areas, the Government of Mozambique has made rural electrification development a priority led by the Mozambique Energy Fund Institute (FUNAE), which focuses on small, off-grid projects of less than 10MW. Electricidade de Moçambique (EDM) is the sole electrical utility in the country.
