NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and the Southern African region. The contract was awarded to Shandong Electrical, Engineering & Equipment Group Co.

Ever wondered how a desert nation could become a renewable energy trailblazer?

Enter the Windhoek Energy Storage Project - Namibia's \$280 million answer to solar power's "sunset problem." As the sun dips below the Kalahari dunes each evening, this lithium-ion and flow battery hybrid system kicks.

Europe, the Middle East and Africa (EMEA). The high energy density of Li-ion based batteries in combination with a remarkable round-trip efficiency and constant decrease in fe operations and transparent information. Equipped w closer to reaching its green-energy goal. Its Renewable Energy Policy.

Namibia is set to expand its power storage capacity in the energy sector with the introduction of the first-ever Omburu battery energy storage system (BESS). "The BESS project will help government accomplish its goals by ensuring electricity supply security, cost efficiency and self-sufficiency,".
