# Nanya solar Energy Storage Lithium Battery Price

## Overview

---

The cell price has dropped by 30% to \$78/kWh, equivalent to approximately 0.56 yuan/Wh in Chinese currency, while the battery pack price has decreased by 20% to \$115/kWh, or 0.805 yuan/Wh. What happened to lithium-ion battery energy storage systems in November 2024?

In November 2024, the lithium-ion battery energy storage system quotation and winning bid price hit new lows again. The quotation range of lithium-ion battery energy storage systems was 0.398 - 1.395 yuan/Wh, with an average quotation of 0.56 yuan/Wh, a 16.4% decrease compared to October.

How much does a battery cost in China?

The cell price has dropped by 30% to \$78/kWh, equivalent to approximately 0.56 yuan/Wh in Chinese currency, while the battery pack price has decreased by 20% to \$115/kWh, or 0.805 yuan/Wh. In November 2024, the lithium-ion battery energy storage system quotation and winning bid price hit new lows again.

How much does a 1MWh battery energy storage system cost?

For a 1MWh battery energy storage system, Energetech Solar offers a system with a price of \$438,000 per unit for a 500V - 800V system designed for peak shaving applications. There are also quantity discounts available, with the price dropping to \$434,350 for purchases of 3 - 9 units and to \$431,000 for purchases of 10 or more units.

How much does Energetech solar cost?

The winning bid range was 0.439 - 1.395 yuan/Wh, and the average winning bid price was 0.75 yuan/Wh, an 11.9% increase compared to October. For a 1MWh battery energy storage system, Energetech Solar offers a system with a price of \$438,000 per unit for a 500V - 800V system designed for peak shaving applications.

What happened to battery energy storage systems in Germany?

Small-scale lithium-ion residential battery systems in the German market suggest that between 2014 and 2020, battery energy storage systems (BESS) prices fell by 71%, to USD 776/kWh.

Are battery electricity storage systems a good investment?

This study shows that battery electricity storage systems offer enormous deployment and cost-reduction potential. By 2030, total installed costs could fall between 50% and 60% (and battery cell costs by even more), driven by optimisation of manufacturing facilities, combined with better combinations and reduced use of materials.
