Netherlands wall-mounted energy storage power supply factory

Overview

Is there a roadmap for energy storage in the Netherlands?

In the Netherlands, there has also historically not been a roadmap or detailed industrial strategy with supportive legislation, policy, taxation reliefs, or investment incentives for the energy storage market.

Why does the Netherlands need energy storage?

“As the Dutch energy transition efforts accelerate, the demand for flexibility is growing also. The challenges to our electricity grid have never been greater. Without adequate energy storage, the Netherlands risks increasing grid instability and security of supply risks,” Lion Storage said in its announcement.

What is Wärtsilä's energy storage project?

This is Wärtsilä's first project in the Netherlands and one of the first of its kind anywhere in central Europe. As the largest energy storage project in the Netherlands to date, it will store the equivalent of the annual energy consumption of more than 9,000 households each year and reduce annual carbon dioxide emissions by up to 23,000 tonnes.

Does the Netherlands have a natural gas policy?

The Netherlands has also committed to eliminating natural gas from its energy mix entirely in favour of cleaner sources. The growth of renewable energy generation in the Netherlands and across Europe has played a vital role in decarbonising energy production.

What do market participants want from energy storage solutions?

Market participants also indicated that they wanted national targets set for energy storage solutions, and more efficient permitting procedures to support them in the development of storage assets. The government responded to some of the feedback from market participants, issuing its first Energy

Storage Roadmap in June 2023.

What is the energy storage roadmap?

The government responded to some of the feedback from market participants, issuing its first Energy Storage Roadmap in June 2023. Amongst other points, this recognised the important role that energy storage will play in the coming years and the importance of market participants coming together to develop a holistic approach for storage assets.
