New demand for solar panels

Overview

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. What will drive the growth of solar PV panels industry?

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. Asia Pacific held the largest market share of over 54.0% in 2023.

Why is the solar panel market growing?

The solar panels market is experiencing significant growth due to increasing environmental concerns, government incentives, and declining costs of solar technology. The trend towards renewable energy sources, coupled with the need for energy independence, is driving the adoption of solar panels in both residential and commercial sectors.

Will new solar PV panels increase demand over the forecast period?

The launch of new solar PV panel products in residential applications is expected to increase product demand over the forecast period. In December 2022, Soloes launched next-generation solar panels, ANTARES BI 144, with high radiation capacity and proof against negative effects from sunlight.

Is demand for solar energy still strong?

Despite ongoing challenges in the photovoltaic industry, including significant price reductions and reduced profit margins, demand for solar energy remains strong, both domestically and internationally, said Wang Bohua, honorary chairman of the China Photovoltaic Industry Association.

What is solar photovoltaic power demand?

Worldwide solar photovoltaic (PV) power demand has been experiencing

exponential growth in the last decade. During this period, PV evolved from a niche market of small scale applications to becoming one of the main renewable electricity sources.

What is the market share of solar panels in 2025?

Key Takeaways of the Solar Panels Market: Monocrystalline solar panels segment is projected to account for 41.6% of the market share in 2025. The residential segment is expected to hold a 34.6% share of the global solar panels market in 2025. The On-Grid segment is expected to hold 54.6% of the global solar panels market in 2025.
