New energy storage power station project epc

Overview

How many mw can a New York battery storage facility hold?

When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once completed, the project will be amongst the largest battery storage installations in New York State.

What is nycida's largest battery energy storage project?

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households.

How will battery storage impact New York City's future?

“Battery storage will play a significant role in advancing New York City’s just transition to a clean energy future and will help to replace dependency on highly pollutive peaker plants that emit dangerous pollutants - ultimately creating a brighter and healthier future for all New Yorkers,” said NYCEDC President & CEO Andrew Kimball.

Are battery energy storage systems regulated in New York City?

Battery energy storage systems in New York City are rigorously regulated, with oversight from the safety industry, federal, state, and local authorities. All code, location, spacing, and other local requirements must be met.

Will New York Power Authority re-develop Poletti power plant property?

“The New York Power Authority is pleased to see this milestone project for the re-development of the former Poletti power plant property take one more step forward,” said New York Power Authority President & CEO Justin E. Driscoll.
