

Kongres Container

New independent energy storage project company

Overview

Why do we need long-duration and multi-day storage technologies in New York?

As renewable power becomes a larger part of New York's energy mix, long-duration and multi-day storage technologies will be needed to ensure grid reliability during extreme weather events, lulls in renewable energy generation, and periods of severe transmission congestion.

Can energy storage solutions deliver more reliable electricity to New York communities?

NYSERDA President and CEO Doreen M. Harris said, "The possibilities created by innovative energy storage solutions can safely deliver more reliable electricity to New York communities as part of building an affordable and resilient zero-emission future.

Will multi-day energy storage help New York meet decarbonization and grid reliability goals?

Mateo Jaramillo, Co-Founder and CEO of Form Energy, remarked, "We are very pleased to have been selected for NYSERDA's long-duration energy storage award. Our analysis indicates that multi-day storage has significant potential to help New York meet its decarbonization and grid reliability goals.

Where is Elevate Renewables developing a utility-scale energy storage facility?

Elevate Renewables is developing a utility-scale energy storage facility at the Essex Generating Station located 5 miles from New York City in Newark, New Jersey. Elevate Renewables is developing a utility-scale energy storage facility at the Sewaren Generating Station located less than 1 mile from New York City near Woodbridge, NJ.
