New infrastructure construction of solar base stations for Australian communications

Overview

Who approves a mobile phone base station?

There are rules and standards telcos must follow to install mobile phone base stations. The decision on who approves a base station depends on several planning factors, including: the classification/zoning of the land.

Who approves a base station?

The decision on who approves a base station depends on several planning factors, including: the classification/zoning of the land. To find out if a base station requires approval under local government, state or territory planning law, please contact your local council.

What is the NSW telecommunications facilities guideline including broadband?

The NSW Telecommunications Facilities Guideline Including Broadband supports the roll out of broadband in NSW and aims to ensure that both wireline and wireless telecommunications infrastructure, including for broadband, can be provided in an efficient and cost effective manner to meet community needs for telecommunications services.

Why did base stations use variable transmission power?

Base stations and mobile phones utilised variable transmission power so that range and cell size could vary. As the system expanded and neared capacity, the ability to reduce transmission power allowed new cells to be added, resulting in more, smaller cells and thus more capacity.

What is the mobile phone base station deployment code?

The Mobile Phone Base Station Deployment Code applies to both exempt development and complying development that requires fixed radiocommunications infrastructure to supply public mobile telecommunications services. Refer to the notification and consultation sections of the Code, and Appendix E of this Guideline.

What if a mobile phone base station is low-impact?

If a base station is low-impact or no approval is required under the local government, state or territory planning process, telcos consult with you by following the applicable consultation process in the Mobile Phone Base Station Deployment Code. All mobile phone base stations must stay within the safe limits of electromagnetic energy (EME).
