Outdoor power supply suitable for home

Overview

Portable generators and whole-home generators provide power for outdoor activities or outages due to storms. These generators operate on propane or natural gas. But there's another option that uses the sun's energy to store needed power: solar-powered generators.

Portable generators and whole-home generators provide power for outdoor activities or outages due to storms. These generators operate on propane or natural gas. But there's another option that uses the sun's energy to store needed power: solar-powered generators.

Portable power stations can deliver power when you need it most, whether during power outages or just for an off-grid adventure. These handy electricity suppliers vary in size, output, and energy source, not to mention durability. That's why we've tested 22 models since 2022; some we've kept on.

So, if you're on a 3 - day camping trip, you'll need a power supply with a capacity of at least $(50 + 15) * 3 = 195$ watt - hours. We have some great options in terms of power capacity. Check out our LiFePO4 Portable Power Station. It comes in different capacities, so you can choose one that fits.
