# Pack lithium battery application scenarios

## Overview

---

What is a lithium ion battery pack?

All essential components of a lithium ion battery pack are addressed to support engineers developing both simple portable devices and complex motive applications. The technical information presented enables the creation of efficient, safe, and reliable battery systems that meet specific application requirements.

Do new energy vehicles need a custom lithium battery pack?

As we all know, some new energy vehicles needs to be equipped with custom lithium battery pack. Let me introduce four major application scenarios of PPS in the field of new energy vehicles. Polyphenylene sulfide (PPS) is an aromatic semi-crystalline special polymer.

What are Li-ion batteries used for?

During this period, Li-ion batteries have been used in different fields such as electronic devices, smart-home, transportation, etc. The paper analyzes the design practices for Li-ion battery packs employed in applications such as battery vehicles and similar energy storage systems.

What is lithium-ion battery pack construction?

Lithium-ion battery pack construction requires systematic engineering methodology across electrical, mechanical, and safety disciplines. The design process demands careful evaluation of technical trade-offs at each stage, from initial cell selection through final certification compliance.

Why is safety protection important in lithium ion battery pack design?

Safety protection systems represent critical components in lithium ion battery pack design. Multiple protection layers prevent catastrophic failures and ensure reliable operation throughout the battery service life.

What is a Li-ion battery pack?

A Li-ion battery pack is a complex system with specific architecture, electrical schemes, controls, sensors, communication systems, and management systems. Current battery systems come with advanced characteristics and features; for example, novel systems can interact with the hosting application (EVs, drones, photovoltaic systems, grid, etc.).
