Polish Telecommunication Base Station Inverter Grid Connection Construction Regulations

Overview

How will Poland's new grid connection agreement affect DSOs & TSOs?

The amendment also introduces a new type of grid connection agreement designed to address the limited capacity of Poland's infrastructure. Under the proposed rules, DSOs and TSOs will be able to offer flexible connection agreements in areas where the grid is currently constrained.

What are the changes to the regulatory framework for grid connection?

It introduces several important changes to the current regulatory framework for grid connection. The proposal is aimed at optimising the use of existing grid infrastructure and increasing the transparency of the grid connection process. Public consultations of the Project are now open.

How much does a grid connection cost in PLN?

The fee will depend on the requested connection capacity, PLN 1 per 1 kV indicated in the request, and will be capped at PLN 100,000. The advance payment for the grid connection is going to double to PLN 60 per requested 1 kV of the connection capacity and will be capped at PLN 6,000,000, instead of the current PLN 3,000,000.

Who is the Polish photovoltaics Association?

The Polish Photovoltaics Association, as part of the work of the Working Group on Technical Requirements, together with other.

What information will be published on grid connection conditions?

In addition, detailed information about entities applying for grid connection conditions ("GCC"), refusals to grant the GCC and the criteria used by the ESO to calculate the network capacity available for new connections and the possibility of flexible grid connections will be published.
