EDP, the leading developer of decentralized solar energy in Portugal, and Bondalti have joined forces in a pioneering project to decarbonize the largest Portuguese group in the Chemical Industry sector. Strengthening their partnership, EDP will install two batteries to store renewable energy for.

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage technologies into large-scale solar projects. By Paulo Lopes, in Business · 26 Aug 2025, 09:31 · 0 Comments A clear example comes from.

A total of 43 projects were selected from 79 applications in Portugal's 2025 energy storage procurement. This included six projects from Spain's Iberdrola, which secured nearly EUR 20 million in public funding. Portugal's Ministry of Energy has announced that it has allocated EUR 100 million.

Global energy storage platform provider Powin LLC and Galp, Portugal's leading integrated energy company, have partnered to install a utility-scale battery energy storage system (BESS) at one of Galp's solar power plants near Alcoutim, a small village in the country's sunny southern region of the.

Bondalti and EDP, leader in the development of decentralised solar energy in Portugal, have teamed up on a pioneering project in Portugal, called BESS - Battery Energy Storage Systems, which involves the installation of two batteries to store renewable energy for self-consumption at Bondalti's.

The project will allow Bondalti to take advantage of local renewable energy

production, reducing influence of intermittent solar energy and ensuring all energy produced is used, the company said. Portuguese utility EDP and domestic chemical firm Bondalti have teamed up on a BESS project in Portugal.
