Prices of solar power generation in Ukraine

Overview

Solar on residential rooftops is popular for saving on electricity bills, which rose in the mid-2020s. Solar is also suitable for many . At the beginning of 2022 there was 1.2 GW of household solar, of which it is estimated 280 MW had been destroyed by the end of 2024. The IEA estimate that if all (excluding north-facing) roofs had panels 290 TWh could be generated.

Ukraine's National Renewable Energy Action Plan, adopted in August 2024, sets renewable energy targets of 27% of electricity consumption and 25% of generation (2022: 14.3%), to be achieved by 2030.

Ukraine's National Renewable Energy Action Plan, adopted in August 2024, sets renewable energy targets of 27% of electricity consumption and 25% of generation (2022: 14.3%), to be achieved by 2030.

Ukraine's ASEU Board Vladyslav Sokolovsky (1st from left) sees the Ukrainian solar PV market growing significantly in 2025. (Photo Credit: Ukrainian Solar Energy Association) War-torn Ukraine was able to expand its solar energy market by 800 MW to 850 MW in 2024 as businesses and households relied.

According to Ukraine's 2030 economic strategy, key objectives for the development of the national economy include decarbonisation and increasing the share of renewable energy sources (RES) to 25 per cent. Prior to Russia's full-scale invasion, we were making significant progress and held leading.
