Profitability of Somalia Energy Storage Project

Overview

The private sector has pioneered mini-grids and hybrid systems that combine solar energy, battery storage with diesel, reducing tariffs for commercial and industrial consumers to as low as \$0.25–\$0.40 per kilowatt-hour (kWh).

Prolonged droughts, erratic rainfall and floods are disrupting Somalian lives and pushing millions into displacement. Somalia's reliance on biomass fuels and integration into the global trade system, including the importation of more carbon-intensive goods, raises deforestation and emissions.

The International Renewable Energy Agency (IRENA) is an intergovernmental organisation that supports countries in their transition to a sustainable energy future and serves as the principal platform for international co-operation, a centre of excellence, and a repository of policy, technology.

The Somali government has kicked off a tender for the design, supply, installation, testing and commissioning of a 55 MW solar plant with a 160 MWh battery energy storage system (BESS) in Mogadishu. The deadline for applications is April 14, 2025. Somalia's Ministry of Energy and Water Resources.

This Horn of Africa nation is making serious moves in renewable energy. With blistering sunshine 300+ days a year, Somalia's betting big on solar-plus-storage projects to rebuild its power sector. And here's the kicker: the World Bank's pouring millions into making it happen [1] [3]. 2025's already.
