Purchase of flat-plate solar panels for self-built houses in Kiribati

Overview

Should you buy a solar-equipped home?

Home solar is more popular than ever, and if you're in the market for a new home, you might come across options with solar panels already installed. It's important to understand the unique aspects of buying a solar-equipped home so you can enjoy the benefits of solar energy without going through the installation process.

How much energy does a solar flat plate water heating system use?

Installing a solar flat plate water heating system for your home can reduce your energy consumption by as much as 40% to 50%. It only takes 1 or 2 solar flat plates to heat over 80 gallons of hot water per day - all for free. Many people don't realize how much energy is used just to provide hot water in your home.

Can you buy solar panels yourself?

While it is possible for homeowners to buy solar panels themselves, either used or directly from the manufacturer, there are a few reasons to buy them through an installer. Design a custom solar system and compare quotes online. The back way into buying solar panels is buying a house that already has solar panels installed.

How much does it cost to install solar panels on a rooftop?

The final price to install solar panels on a rooftop might differ by \$50,000 from one house to another. But some costs are common to almost every installation. As you sketch out your dream system and think about your budget, our aim is to give you the knowledge to ask potential installers detailed, informed, and revealing questions.

Are solar flat plate collectors a good idea?

Using solar flat plate collectors, you can take advantage of the sun's abundant

energy to lower your own energy costs. This means lower bills every month, free hot water for your home, and more energy independence. Solar flat plate collectors are an affordable solution to rising energy costs.

Should I install a solar flat plate water collector?

Flat plate collectors are traditionally used in warmer, sunnier climates. For cooler, cloudier areas, and areas that have long, cold winters, you may wish to consider our solar evacuated tube collectors. Installing a solar flat plate water heating system for your home can reduce your energy consumption by as much as 40% to 50%.
