Reset the battery of outdoor base station

Overview

Remove the battery cover on the bottom using a screwdriver. Take out the backup battery and wait 30-60 seconds. Reinsert the battery and replace the cover. Plug the base station back in and let it power up. Press and hold the setup button (if available) to complete the.

Remove the battery cover on the bottom using a screwdriver. Take out the backup battery and wait 30-60 seconds. Reinsert the battery and replace the cover. Plug the base station back in and let it power up. Press and hold the setup button (if available) to complete the.

It appears that the outdoor cam hub/basestation has gone catatonic. I have power cycled it, tried different ethernet cables, different router ports, no joy. At this point I want to just reset everything to the factory defaults and try again, but I can't get the wyze cam outdoor hub to "rediscover".

Following is a basic restart procedure for clocks and weather stations that do not have wind or rain: Bring both units inside and have the units 3-5 feet apart with nothing between them. Remove all power from both units. Press one of the buttons on the display at least 20 times to clear all memory.

To reset SimpliSafe Base Station, do this: Unplug the base station from the wall outlet. Remove the battery cover on the bottom using a screwdriver.[more](#)
[Learn How To Reset Simplisafe Base Station.](#) To reset SimpliSafe Base Station, do this: Unplug the base station from the wall outlet. Remove the.

It's possible that you'll need to reset your Wyze base station. Although purchasing a smart surveillance camera from Wyze is a valuable decision, it might be possible that you wish to reset its base station for the occasional malfunction or troubleshooting. There could be many solutions to the.

While SimpliSafe is one of the most user-friendly home security systems available today, knowing how to reset it correctly can save you time and help restore peace of mind. In this guide, we'll cover how to reset SimpliSafe devices, including the Base Station, Keypad, Entry Sensors, Motion.

When troubleshooting your system, there may come a time when you need to reset your Base Station to clear out any errors. You'll need to be able to access the bottom of the Base Station to complete these steps. You'll also need your own Phillips head screwdriver to access the Base Station's battery.
