Russian 5G communication base station hybrid energy construction project

Overview

How much will Russia spend on 5G base stations?

Earlier, Russian Prime Minister Mikhail Mishustin said that the government would additionally allocate about 3.5 bln rubles (\$38.61 mln) to make base stations to facilitate the transition to 5G networks for operators.

Will Russia help Ukraine with 5G?

Prior to Russia's invasion of Ukraine, foreign vendors previously helped with limited 5G test zones in the country. In January 2023, Russian telecom operators entered into forward contracts with Russian manufacturers of base stations for communication networks for over 100 Billion rubles (\$1.32 Billion).

When will 5G start in Russia?

"The active deployment of 5G networks at domestic base stations will begin in 2026 in large Russian cities," the minister said, noting that preparatory work to launch the networks will take place in 2025.

Will Russia test 5G in 2025?

According to Russian news agency Tass, Russia expects to conduct pilot testing of 5G networks in 2025 using "home grown"/ locally built base stations. Russia's Ministry of digital development, communications and mass media Maksut Shadayev said, "We expect a pilot test to begin in 2025 in cities with more than one million people."

Does Russia have a 5G network?

The spectrum will be reallocated for 4G and 5G instead. As of yet, Russia has not launched 5G networks. The country has fallen behind in the 5G race following the fallout of its conflict with Ukraine, with high-profile vendors Ericsson and Nokia exiting Russia.

Why has Russia fallen behind in the 5G race?

Russia has fallen far behind in the 5G race due to sanctions following its invasion of Ukraine. High-profile network equipment vendors Ericsson and Nokia have left the country.
