# Saudi Arabia household energy storage battery lithium iron phosphate

## Overview

---

Who owns the Bisha battery storage facility?

Owned by the Saudi Electric Company (SEC), the Bisha battery storage facility comprises 122 prefabricated storage units, designed and manufactured by China's BYD. Each unit houses a 6 MW power conversion system (PCS) paired with four lithium iron phosphate (LFP) battery modules, each boasting a capacity of 5.365 MWh.

Does Saudi Arabia have a battery energy storage system?

Saudi Arabia has officially commissioned its largest battery energy storage system (BESS) to the grid, signifying a pivotal advancement in the nation's renewable energy expansion endeavors.

Why is Saudi Arabia investing in lithium?

This surge in energy storage capacity is complemented by Saudi Arabia's strategic investments in the lithium supply chain, a critical component for battery production. Saudi Aramco, in partnership with state-owned mining company Ma'aden, plans to commence commercial lithium production by 2027.

Is Saudi Arabia launching a large-scale battery storage project?

This project is one of several large-scale battery storage initiatives underway in Saudi Arabia.

How many GWh of energy storage will Saudi Arabia have by 2025?

Projections indicate that Saudi Arabia aims to operate 8 GWh of energy storage projects by 2025 and 22 GWh by 2026, positioning the nation as the third-largest global market for energy storage, following China and the United States.
