The world is witnessing a new wave of transformation—a revolution that extends far beyond the realm of energy. The Slovakia Gotion Gigafactory Milestone Celebration Ceremony of Slovakia's first electric-vehicle battery plant officially began on October 28 in Šurany. It is redefining how industries.

Slovakia Gotion Gigafactory Milestone Celebration Ceremony of Slovakia's first electric-vehicle battery plant officially began on October 28 in Šurany. It is redefining how industries evolve, how economies grow, and how humanity envisions its shared future. The transition to clean energy is no.

The first phase of the plant is planned with a capacity of 20 GWh, with trial production scheduled for 2026 and full-scale production starting in 2027. Products will primarily be exported to the EU market, creating 1,300 new jobs in the Šurany region during the initial phase. Gotion High-tech (SHE:.

Slovakia's first EV battery facility has officially launched, with Gotion High-Tech marking the milestone at a ceremony held on 28 October in Šurany. Occupying 95 hectares, the site is engineered for an initial capacity of 20GWh and is scheduled to begin production in 2027. All EV battery output.

On October 28, 2025, a significant milestone in clean energy and manufacturing was unfolded in Šurany, Slovakia, with the inauguration of the Gotion Gigafactory. This state-of-the-art facility isn't just the first of its kind in Slovakia; it's a transformative hub that sets new standards for energy.

Gotion High-Tech broke ground on a 65-hectare, 20 GWh battery plant in Šurany, Slovakia, with trial production in 2026 and full-scale output in 2027, exporting across the EU and creating about 1,300 jobs as part of its global expansion. Gotion High-Tech has begun construction on a large-scale.
