Slovenia energy storage mobile power manufacturer

Overview

Slovenian battery manufacturer TAB (TAB tovarna akumulatorskih baterij d.d.) is opening the first gigafactory for lithium-ion energy storage systems (ESS) in Prevalje in 2024. Where does Slovenia's electricity come from?

Approximately one-third of Slovenian electricity consumption is derived from two brown-coal and lignite fired power stations. These ageing power stations account for all of the domestically mined coal.

Who is the largest producer of electricity in Slovenia?

With a 65% share of produced electricity, the HSE Group is the largest producer in Slovenia. Our power plants annually produce around 7 terawatt hours of electricity. We are one of the main daily traders in Southeast Europe. The HSE Group trades in electricity in 20 European countries, 24 hours a day and every day of the week.

Does Slovenia have gas storage facilities?

Slovenia does not have gas storage facilities, and is dependent on infrastructure in Austria and Croatia. Slovenia has expressed interest in securing U.S. LNG sources via terminals in Krk, Croatia, or Rovigo, Italy, to diversify its supply. Beginning in 2027, Geoplin booked additional capacity to acquire LNG from the Krk terminal.
