Small wind power generation system in Eritrea

Overview

Eritrea is developing building its capacity from such sources as wind and solar. Development of sources helps give the country access to reliable energy and lower greenhouse gas emissions. The government of Eritrea built a wind energy pilot project in the city of Assab in the Southern Red Sea region in 2010 with the help of the . The wind.

Brief Description: The project aims at transforming the market for wind energy applications in Eritrea. Key components are the installation and operation of a small wind park (750 kW) connected to the grid as well as eight decentralised wind stand-alone and wind-hybrid systems in rural villages.
