

## Kongres Container

# Solar PV outdoor site energy prices

## Overview

---

What is residential solar PV?

Residential solar PV refers to home solar power systems that generate electricity using photovoltaic (PV) panels. The solar price for residential installations depends on factors like system size, installation costs, location, and available incentives.

Does commercial solar cost a lot?

The solar price for commercial projects varies based on system size, location, energy needs, and available incentives. Unlike residential solar, commercial solar pricing benefits from economies of scale, resulting in a lower levelized cost of electricity (LCOE).

What is commercial solar PV?

Commercial solar PV refers to solar photovoltaic (PV) systems installed on businesses, offices, factories, and other commercial properties to generate electricity. The solar price for commercial projects varies based on system size, location, energy needs, and available incentives.

Will the cost of capital increase in solar PV & wind markets?

In real terms (i.e. excluding the impact of inflation), the weighted average cost of capital (WACC) is expected to increase in most large solar PV and wind markets, excluding China. The higher cost of capital could offset most of the cost decreases resulting from lower commodity prices and further technology innovation in the next two years.

Are solar PV projects reducing the cost of electricity in 2022?

Between 2022 and 2023, utility-scale solar PV projects showed the most significant decrease (by 12%). For newly commissioned onshore wind projects, the global weighted average LCOE fell by 3% year-on-year; whilst for offshore wind, the cost of electricity of new projects decreased by 7% compared to

2022.

Does solar PV cost a government bond?

Both show negative solar PV premiums ranging from -2% to -2.7%, which means that we calculate a financing cost for solar PV that is below the financing cost for the government, i.e., a 10-year government bond. While there may be cases where this is plausible, it is unlikely for Brazil and China.
