# Solar energy storage battery 100 kWh electricity cost

## Overview

---

Installing home battery storage typically costs between \$6,000 and \$18,000, according to live pricing from solar.com's installation network. Why such a wide range?

The biggest factor is size, measured by how many kilowatt-hours (kWh) of electricity the battery can store.

Installing home battery storage typically costs between \$6,000 and \$18,000,

according to live pricing from solar.com's installation network. Why such a wide range?

The biggest factor is size, measured by how many kilowatt-hours (kWh) of electricity the battery can store. Battery systems can range.

Buyers typically pay a broad range for utility-scale battery storage, driven by system size, chemistry, and project complexity. The price per kWh installed reflects balance of hardware, permitting, and integration costs. Cost also hinges on duration, interconnection requirements, and regional labor.
