Solar energy storage equipment foreign trade

Overview

How many exclusions are there for solar manufacturing equipment?

Exclusions for solar manufacturing equipment, reduced to 14 from the 19 initially proposed: USTR's May Notice proposed 19 exclusions covering solar manufacturing equipment: five for equipment to manufacture solar modules; six for solar cells; and eight for solar wafers.

Are solar and storage projects eligible for tax credits?

To be eligible for tax credits, materials from a prohibited foreign entity (PFE) must be under a certain percentage threshold. These thresholds are different for solar and storage projects and increase annually:.

Are solar and energy storage developers facing a complex landscape?

With the budget bill passed and new Section 232 polysilicon and AD/CVD cases making headlines, solar and energy storage developers and equipment buyers are facing an increasingly complex landscape.

Are bifacial solar panels excluded from tariffs?

As a result of the public input received, USTR announced certain products would be excluded from tariffs in September 2018, 25 and excluded further products in June 2019, including bifacial solar panels that absorb light and generate electricity on both sides of the panel (bifacial modules). 26.

When does a solar project qualify for a tax credit?

Currently, solar projects must be placed in service by the end of 2027 to qualify for the tax credit. There's an exception for projects that start construction within one year of bill passage (by July 4, 2026), enabling those projects to get 100% ITC if placed in service within 4 years.
