Overview

Current offers from leading manufacturers of utility-scale projects are in the low-\$0.080/W range. The FOB China TOPCon module price for the first-half 2025 loading was at \$0.085/W, with values between \$0.082-0.087/W.

Current offers from leading manufacturers of utility-scale projects are in the low-\$0.080/W range. The FOB China TOPCon module price for the first-half 2025 loading was at \$0.085/W, with values between \$0.082-0.087/W.

FOB China: The Chinese Module Marker (CMM), the OPIS benchmark assessment for TOPCon modules from China dropped 1.15% on the week to \$0.086/W Free-On-Board (FOB) China, amid lower price indications between \$0.080-0.092/W. Despite upstream price firmness, module prices remain under pressure as.

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories. Summary data include volumes in peak kilowatts and average prices. Where possible, imports and.

After holding steady for much of Q1, distributed generation (DG) solar module prices spiked mid-Q2 — only to partially settle by the end of June, according to Anza's latest pricing insights report. The culprit?

A rush of new tariffs and import duties that sent module prices climbing, before freight.

India's solar module exports to the US have risen by approximately 3-4 cents/W compared to other destinations, largely due to a regulatory requirement imposed by the US importers, sources said July 1. The price difference is linked to the US ban on solar cells sourced from China's Xinjiang region.

To comprehensively address the user's query about solar module price trends, I need to gather information on recent price changes, historical price trends, factors influencing these prices, and market predictions. I should look for data

from reliable sources such as industry reports, market.
