

## Kongres Container

# Solar panel processing industry

## Overview

---

### What is Solar Manufacturing?

Solar manufacturing refers to the fabrication and assembly of materials across the solar value chain. Solar photovoltaic (PV) modules include many subcomponents like wafers, cells, encapsulant, glass, backsheets, junction boxes, connectors, and frames.

### What is Solar Manufacturing?

Solar manufacturing refers to the fabrication and assembly of materials across the solar value chain. Solar photovoltaic (PV) modules include many subcomponents like wafers, cells, encapsulant, glass, backsheets, junction boxes, connectors, and frames. In addition to modules, there are many.

The US solar industry installed 7.5 gigawatts direct current (GW dc) of capacity in Q2 2025, a 24% decline from Q2 2024 and a 28% decrease since Q1 2025. Solar accounted for 56% of all new electricity-generating capacity added to the US grid in the first half of 2025, with a total of 18 GW.

This timely approval keeps our scale up plans for commissioning our first industry-scale facility in Silver Springs, NV, right on schedule. Comstock Metals expects the receipt of a similar notification of approval for the Air Quality control permit in the next few weeks, also with the normal.
