Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

Minus tax credits, a typical \$20,000 residential solar power system costs about \$14,000. Tack on another \$10,000 if you want batteries. It’s a serious investment, but eventually it pays off. Solar panels are surprisingly low maintenance. You’ll need to have a professional to clean and inspect them.
