WASHINGTON, JUNE 6, 2024 - The World Bank's Board of Executive Directors approved a \$35 million grant to enable solar power generation and increase access to electricity in Guinea-Bissau. The Guinea-Bissau Solar Energy Scale-up and Access Project will work on the development of solar energy.

The World Bank has announced that it will support the development of Guinea-Bissau's first solar power plants. Like other West African countries, Bissau wants to use this solution to decarbonise its electricity production and accelerate the electrification of its population. Guinea-Bissau wants to.

The first photovoltaic solar power plants have been put into operation in Uinea-Bissau. The World Bank has initiated development support plans whose objective is to decarbonize the country's electricity production and promote electrification. The project involves the construction of several solar.

Guinea-Bissau has embarked on a transformative journey with the launch of a pivotal \$43.5 million solar energy project. This initiative, supported by the World Bank, aims to enhance electricity access and reduce the nation's reliance on fuel imports. The project plans to introduce 22.3 megawatts of.

The World Bank is supporting the development of Guinea-Bissau's first solar power plants, aiming to decarbonise electricity production and boost electrification. Under the Solar Energy and Access to Electricity Development Project, the World Bank will assist Guinea-Bissau until 2030 and has already.
