Solar power generation system in Croatia

Overview

Croatia is on pace to surpass 1 GW of solar power by 2025, thanks to a surge in installations and supportive government policies. This growth is part of the country's broader commitment to renewable energy and aligns with EU targets to boost the share of renewables in electricity.

Croatia is on pace to surpass 1 GW of solar power by 2025, thanks to a surge in installations and supportive government policies. This growth is part of the country's broader commitment to renewable energy and aligns with EU targets to boost the share of renewables in electricity generation.

Croatia's solar market continues to grow steadily, led by the self-supply and commercial and industrial (C&I) segments, while regulatory barriers stall utility-scale development. Croatia's cumulative solar capacity reached 1,099 MW at the end of June 2025, according to figures from the Renewable.

At the end of November 2024, Croatia had 25,406 solar power plants on the distribution grid, with a total capacity of 776 MW. The country achieved growth of 60% since the end of 2023 in both the number of photovoltaic plants and their capacity. Great interest in installing solar power plants for.

Solar PV capacity accounted for 16.4% of total power plant installations globally in 2023, according to GlobalData, with total recorded solar PV capacity of 1,496GW. This is expected to contribute 33.7% by the end of 2030 with capacity of installations aggregating up to 4,822GW. Of the total global.

Starting January 1, 2026, Croatia will introduce a major change for new solar energy users — ending the current generous net metering system and replacing it with a new net billing model. This shift will significantly impact the financial returns of home solar installations and reshape how.

ZAGREB, 3 May (Hina) – The number of solar power plants has been on the rise in Croatia, as evidenced by recent data. As of 31 March 2024, a total of 17,697 solar power plants were connected to the national power provider HEP's grid, of which 12,495 were in the category of households and 5,202 in.
