# South Sudan develops battery energy for communication base stations

## Overview

---

Clear Blue Technologies to implement renewable energy solutions, bringing sustainable power to rural, off-grid telecommunications sites in South Sudan and the DRC.

Clear Blue Technologies to implement renewable energy solutions, bringing sustainable power to rural, off-grid telecommunications sites in South Sudan and the DRC.

Clear Blue Technologies to implement renewable energy solutions, bringing sustainable power to rural, off-grid telecommunications sites in South Sudan and the DRC. Hybrid renewable energy-battery systems will ensure market-leading 99.97% uptime for Clear Blue's telecom partners, enabling wireless.

The renewable energy-battery hybrid systems will provide a market-leading 99.97% uptime service level agreement (SLA) to iSAT's mobile network operator (MNO) clients Modular, decentralized energy solutions deployed by Clear Blue Technologies will provide telecom sites with renewables across.

According to the World Bank, only 8.4% of the population had reliable access to power and electricity in 2022, leaving the door wide open to produce much-needed renewable energy in South Sudan. Currently, most of the country's energy production takes place in the capital city of Juba, with very.

Communication Base Station Battery by Application (Integrated Base Station, Distributed Base Station), by Types (Lithium Ion Battery, Lithium Iron Phosphate Battery, NiMH Battery, Others), by North America (United States, Canada, Mexico), by South America (Brazil, Argentina, Rest of South America).

The East African country has an electricity access rate of 8.4% (as of 2022)
